

# SPACE SHOOTER SOUND BUNDLE

This Space Shooter Sound Bundle by Whizzkid Productions is the perfect sound package for your Sci-Fi Space Shooter Game Projects. It contains 102 Sound FX ranging from powerful space weapon sounds, shield impacts and comet trails as well as 5 musical jingles for e.g. completed objectives and such, a looping menu music track and 3 battle themes including an intro and 3 tension levels each.

This is the perfect audio starting point for Game Developers who want to kick off their Space Shooter.

## **How the Battle Theme Tension Stems work**

**Each Battle Theme comes with four Sound Files: An intro and three Tension Level Stems of the same length. The audio tails of each file have been inserted into the following stems, so that you can connect the files seamlessly.**

**Stem 1 is always the basic track and it is advised to keep it running all the time, since it holds most of the musical information and the percussion. You can layer Stems 2 and 3 on top of it, crossfade them out, fade them in, etc., just as you desire. These tracks do not have a dedicated end or outro, that's what the Match Won or Match Lost Jingles are for.**

**See below for a list of the file content**

**I hope that you enjoy these sound assets and can put them to good use. If you liked them, it would be very kind if you could leave a rating on the product store page.**

**Should you have any questions,  
feel free to contact me at [contact@whizzkid-productions.com](mailto:contact@whizzkid-productions.com).**
